CLEAN THE WORLD

Recycling Soap, Saving Lives

Clean the World is a global impact organization whose mission is to save millions of lives around the world through the recycling and distribution of soap.

Our goal is to eradicate hygiene-related deaths by providing sustainable resources, programming, and education focused on water, sanitation, and hygiene for all those affected by poverty, homelessness, and humanitarian or natural crises.

Hotel Soap on a Mission

Used soap is collected by housekeeping and shipped to Clean the World where it is filtered, sterilized, and made into brand new bars of soap. These new soap bars are then distributed through multiple Clean the World programs to people in need around the world.

Start recycling your used soap today.
Email programs@cleantheworld.org to learn more.
